Profile

As a Graphic/UI-UX Designer turned Full-Stack Developer, I am driven by a passion for turning ideas into reality. While I am continuously learning and improving my coding skills, I am most fulfilled when creating responsive and user-friendly websites.

I am driven by a desire to constantly push beyond my perceived limits and take on challenges that test my capabilities. I find great satisfaction in tackling difficult projects and striving towards ambitious goals that push me to reach my full potential.

My areas of specialization include Javascript (React), Node.js, PostgreSQL, SQL, HTML, CSS, Python and the use of various packages for website deployment on both the front-end and back-end.
